

Making quantum computers useful

Quantastica Oy
Business ID: 3087604-6
Address: Lapinlahdenkatu 16 C,
00180 Helsinki, Finland, EU
Web: www.quantastica.com
E-mail: info@quantastica.com

WHO WE ARE

Quantastica is a quantum software startup from Helsinki, Finland, Europe. Pre-Seed 200.000 EUR from Icebreaker VC in late 2019. Team is distributed over the globe (Finland, USA, Germany, India, Serbia).

WHAT WE DO

Quantastica is providing a set of AI-based tools that automate the development of new quantum algorithms. Quantum algorithms designed by robots could solve hardest computational problems facing modern industry. This approach is opening a possibility to break a quantum advantage barrier with near-term noisy quantum computers.

PROBLEM

Companies exploring the use of quantum computing are limited to a small set of quantum algorithms discovered by the greatest minds of our time.

Designing a new quantum algorithm which is optimal for a particular business case is at the edge of human intellectual capabilities.

PRODUCTS

Quantum Algorithm Generator

Automatic development of quantum algorithms
quantastica.com/generator/

Quantum Programming Studio

Visual tool for designing quantum algorithms
